

PROFILE

I'm a second-year Data Analytics student at KPR College of Arts Science and Research, always excited to explore the power of data. With a basic foundation in programming—C, C++, JavaScript, Python, HTML, and CSS—I enjoy turning raw information into meaningful insights. I love problem-solving and continuously seek new ways to apply my skills to real-world challenges. Learning, experimenting, and making an impact with data is what drives me forward.
